

Bolt Cutter (900mm)

The Bolt Cutter (900mm) is a heavy-duty cutting tool designed to slice smoothly through bolts, wire, rods, and cables with minimal effort. Made from high-quality carbon steel with drop-forged high tensile CRV T8 jaws, it delivers superior strength and durability for demanding applications. The adjusting screw keeps cutting edges perfectly aligned, while moulded heavy-duty PVC grips provide comfort and control. Built for leverage and long-term use, this reliable cutter is ideal for trades, workshops, and industrial maintenance tasks.

- Heavy-duty forged steel jaws for strong, clean cuts
- Moulded heavy-duty PVC grips handles for comfort, control and less fatigue
- Adjusting screw for keeping cutting edges aligned and consistent
- Short cutting edge for extra power and accuracy
- Durable and high-strengthen build for reliable, long-term use
- Handles built for leverage and easier cutting
- Material: Steel, Heavy Duty PVC Grips
- Finish: Painted
- Cutting Capacity: soft materials – up to 16mm, medium materials – up to 12mm
