

Storage Cage

The Storage Cage is a high-security, flexible storage solution built for industrial, warehousing, manufacturing, and construction worksites. It features a tamper-proof lock guard and a sheet metal roof for weather resistance, making it suitable for both indoor and outdoor use. For compliant, high-capacity materials management and storage, the interior is customisable to secure various cylinder sizes, firewood, or other site materials. The unit can be easily moved via forklift pockets and can be stacked two high when loaded, maximising floor space.

- Features a tamper-proof lock guard and anti-tamper gate hinges
- Made from sturdy steel with bump rails to protect the high-visibility mesh sides from impact
- The sheet metal roof provides essential weather protection, allowing safe indoor or outdoor storage
- Sheet metal shelving facilitates the easy and safe sliding of cylinders to the back of the unit
- Integrated forklift pockets are built into the base for secure transport across the worksite
- Available supplied flat-packed for on-site construction or fully assembled
- Material: Steel
- Finish: Zinc
- No. of Bottles (with middle shelf): 12x9kg
- No. of Bottles (middle shelf excluded): 6x18kg
- Adjustable Shelf: 3 shelves max. every 250mm
