

Craneable Site Box – 1140mm High

The Craneable Site Box – 1140mm High is a compact storage box for tools, equipment, and materials on site. It can be moved using a crane or forklift and helps protect contents from weather and dust. Suitable for use on construction sites, in warehouses, during shutdowns, and across industrial work areas, with optional shelving available for easier organisation.

- Heavy-duty, fully welded steel construction
- Weather- and dust-resistant finish helps protect stored items
- Crane and forklift compatible up to 1.5 tonne, with lifting lugs and base fork pockets
- Four-way forklift access allows easy handling and repositioning
- Lockable folding T-handle door, keys supplied
- Door opens up to 270° for clear and easy access
- Pallet rackable design with a positive locking base
- Optional extra shelf available; V7769
- Designed and certified to meet relevant Australian Standards
- Material: Steel (2.5mm Thick)
- Finish: Powder Coated Blue
- Stackable: 4 High, fully loaded, 2 high during forklift handling or transport (empty)
- Fork Pocket Size: 358x90mm (Front & Back), 255x92mm (Left & Right)
- Fork Pocket Centre: 608mm (Front & Back), 505mm (Left & Right)
