

## Enclosed Transport & Storage Box (Rackable & Stackable)

The Enclosed Transport & Storage Box (Rackable & Stackable) is designed for the secure storage and handling of hazardous materials, chemical waste, and industrial liquids. It helps reduce spills and improve site organisation. Suitable for indoor and outdoor industrial environments such as warehouses and workshops. It features multiple access points and forklift compatibility for safe, efficient transport.

- Half drop-down gate for easy access
- Bi-fold lid for top access
- 4-way forklift access for easy handling
- 360° rotatable base for handling flexibility
- Stackable up to 4 units when loaded
- Rackable design for storage systems
- Material: Steel
- Finish: Zinc
- 621m High Watertight base section
