

Solid Collapsible Bin with Fold-Down Door

The Solid Collapsible Bin with Fold-Down Door is a high-capacity storage solution designed for agriculture, horticulture, food processing, retail bulk handling, and general logistics. Made from durable, food-grade HDPE, it integrates seamlessly into existing operations thanks to its compatibility with Australian Standard Pallets. Its 3:1 fold-down ratio improves transport efficiency and reduces storage space, while its smooth, non-porous surfaces support hygienic handling.

- Fold Down Door for easy access
- Easy to fold down – 3:1 fold-down ratio improves transport efficiency and storage space when bin is not in use
- Lightweight yet durable HDPE construction (UV-stabilised, food-grade, fully recyclable) provides long service life and easy handling
- Reinforced double-wall corners and centre posts provide stability for demanding, heavy-duty applications
- Racking compatible
- Australian Standard Pallet size ensures compatibility with existing mega bins, racking, pallet jacks and forklifts
- Smooth, non-porous internal surfaces support hygiene & fast cleaning
- Can safely stack up to 10 bins high when empty, 7 high at 300kg, 5 high at 500kg and 3 high at 700kg
- Material: Virgin HDPE
- Colour: Black
- 3% UV protection
